**Dr Alan Kendall**

University of East Anglia

## **Fossil fuels – are they history?**

Increasing evidence points to the world rapidly running out of fossil fuels (oil, natural gas and coal), on which we are highly dependent. It is predicted that scarcities will occur within only a few years (possibly this winter!). Impacts will be widespread and devastating, changing our lives in ways that are only just beginning to be identified. Should we be worried? Dr Kendall will let us know.

**Mon 3<sup>rd</sup> Dec**

**at 7p.m.**

**Free**
